FOR IMMEDIATE RELEASE

Lynxspring at 2014 AHR Expo

Lee's Summit, MO – January 6, 2014 – Lynxspring, a premier developer and provider of open platform control solutions for building automation, energy management and device-to-enterprise integration today announced that it will be featuring new software applications and hardware at this year's 2014 AHR Expo, January 21-January 23 at the Javits Center, New York City. Lynxspring will be at Booth #124.

On the software and application side, Lynxspring will be demonstrating the latest version of JENEsys, the company's Building and Information Software Platform and Operating System, LYNX CyberPro, the first Cyber Protection Solution that secures the remote connection to Building Automation and Energy Management Systems and several new applications for JENEsysONE, the company' controllers for Application Specific Programmable Equipment Control and Small Buildings.

On the hardware side, the company will be showcasing the new JENEsysONE JO-PC3-MC controller, ideal for controlling and monitoring small building systems including HVAC equipment, lighting, and meters and designed to optimize control for individual systems. Also on hand will be the recently announced Franklin Controls VFDs and starter devices designed to meet the operational and facility management challenges of today's buildings and the company's hardware portfolio of JENEsys branded Internet based automation technology and device to enterprise integration solutions for Building Automation and Energy Management.

About Lynxspring

Lynxspring is changing the way devices and systems communicate and collaborate across enterprises. Our technologies enable users to manage and operate their facilities and equipment smarter, safer, more efficiently, and at peak performance levels. Embracing an open, operational and informational framework platform, Lynxspring designs, manufactures and distributes JENEsys, brand Internet based automation infrastructure technology and device-to-enterprise integration solutions for Building Automation, Energy Management, Cyber Security, Equipment Control and other Specialty applications.
