

JENESys enables you to go further to manage and operate your facility smarter, safer, securely, more efficiently, and at peak performance levels

Any Device.

Any System.

Any Network.

Any Protocol.

Anytime.

Anywhere.

Open Control System, Open Protocols and Open Standards for Any Size and Type Building

- Enables multi-vendor integration and interoperability between devices from different manufacturers and disparate systems
- Allows building systems, sub-systems, equipment and devices to work together
- One platform that can be supported by whatever vendor or vendors a building owner, operator or facility manager chooses
- Choice – eliminates building managers and owners from being held captive to proprietary, closed technologies
- Flexibility/Options – allows facility managers, operators and owners to purchase different products from different manufacturers and choose the solutions that best fit their specific needs
- Simplifies facility operations – users can manage all of their diverse systems via a single, easy-to-use, web-based interface
- Combines the capabilities of network management, protocol conversion, distributed control, and the user interface into a single software solution that can operate on a wide range of hardware platforms from the very small to the very large
- Protocol neutral-empowers end users to get above the protocol debates and specify systems that meet their business needs with the confidence that it can be done cost-effectively
- API's are available to enable independent third parties to develop complementary, enterprise applications that can work effectively with the system
- Data from the system is easily stored and retrieved from a common database and can be used throughout the system
- Future Expansion – offers support for a wide range of applications and the scalability to easily add future service and product upgrades
- Building managers and operators can continue to work with the products and vendors they trust, while gaining all the benefits of an integrated and interoperable system
- Provides operational efficiencies that reduce business risk
- Makes it easier to control and manage buildings and realize facility operational efficiencies, ensure occupant comfort and code compliances
- Reduces system complexity and costs
- Maximizes lifetime value of building systems and equipment
