E2E
Edge to Enterprise
BY LYNXSPRING

DATA MANAGEMENT **IDL PLATFORM**

ADPATIVE ENTERPRISE SOLUTION

An edge-to-Cloud solution, E2E was engineered to deliver advanced building automation and management capabilities. It seamlessly integrates our embedded edge controllers with the adaptive OT data managment and IDL platform, providing flexible enterprise solutions that bridge onsiste edge control.

ADVANCED VISUALIZATION

You gain control and management at both the device and server levels with E2E, enabling advanced visualization of builiding devices and equipment across portfolios. E2E goes beyond simple remote connectivity and data access, transforming your buildings into adaptive environments.

CUSTOMIZATION

E2E empowers you to efficiently organize, operate, and optimize building operations both locally, remotely and at scale. Whether you need Cloud-based, onsite or edge-driven solutions, E2E offers the flexibility to tailor fit your specific use case.
